SUPPLEMENT

[REDACTED]

- 25X1X 1. Railroad traffic over the German-Polish frontier from 1 to 10 May 1947 was observed to have the following composition:

Crossing Point	Direction	No. of Trains	No. of Full Cars	No. of Empties
Scheune (Q46)	East	28	2408	5
	West	18	4	837
Frankfurt/Wkr	East	25	4660	12
	West	212	379	5238
Forst (A72)	East	10	259	232
	West	20	345	25
Küstrin (A56)	East	3	125	1
	West	1	1	
Wehrkirch	East	15	222	451
	West	18	639	0
Guben (A70)	East	29	1320	10
	West	47	77	2242

2. No figures were reported for contents of west-bound shipments, except that those passing through Wehrkirch consisted only of coal. It should also be observed that the Küstrin tracks, which had apparently been out of operation, resumed business on 5 May 1947.

3. Eastbound trains carried the goods listed below. Of the traffic through Wehrkirch the report is obviously incomplete, since it comprises only two items. (The going by way of Wehrkirch passed only potash.)

CONFIDENTIAL

Document No. 01

Eastbound Cars via Forst

22	Diesel oil	49 Gasoline
----	------------	-------------

25X1A

Comment: No descriptions of cargoes were obtained on any other localities and the figures cited are not complete. The total number of loaded cars through Scheune, for example, is given as 2408, but the list by contents totals only 2009; for Frankfurt/Oder the total is 4660 but the list above accounts for only 4536.

This document contains information affecting the national defense of the United States within the meaning of the Espionage Act, 50, U.S.C. 31 and 32 as amended. Its transmission or the revelation of its contents in any manner to an unauthorized person is prohibited by law.
